

New Patient Registration Information – Over 16 Years

We are aware that many patients use both a mobile and landline number as a contact for phone communication. We are therefore requesting your mobile telephone number to ensure that the details that we hold for you are as comprehensive as possible. This will help our doctors to contact you in a timely way should they need to get in touch with you about a health matter or if you have booked a telephone appointment/call back.

Additionally the Practice offers a text reminder service to all of our patients, where mobile numbers are known. This means that we can remind you in advance of any booked appointments that you have made with the Practice. We can also contact you with important information about relevant health campaigns we are running, e.g. flu vaccination clinics, etc.

It is important that you keep the mobile number that we hold for you up to date. Please therefore add us to your list of people to contact should you change your number. **You can also update us with any change to your mobile telephone number via our website. Please visit www.attleboroughsurgeries.com**

Accessibility Needs

We want to get better at communicating with our patients. We want to make sure you can read and understand the information we send to you. Please tick below to confirm whether you have any specific communication needs:

YES No

If you have ticked yes, please can you provide details of your specific communication need in order that we can consider how we can best meet your needs and help you to access our services. You can also update via our website www.attleboroughsurgeries.com
